

CW178 Series

Ceiling Mounted & Wall Mounted

Microwave Adjustable Sensor Options

Introduction

This CW178 Series smooth edge IP65 waterproof ceiling lamp has a complete size for option, can conform to various installation requirement. For CCT selectable, it offers wide lighting surface for the illumination effect. In order to control the light efficiently and offer comfortable environment, adjustment of triac dimming and DALI dimming is optional. It comes with rotatable installation on a 360 degree swivel for the lamp cover, and cable entry can be entered on the surface or through the back, which makes the installation simple and quick to save labour cost.

Features

- Rotatable install for lamp cover, both edge cable entry and back cable entry available.
- Complete size options: 250mm/300mm/400mm.
- IP65 waterproof design.
- Interchangeable CCT (3000K+4000K+5700K) with slide switch.
- Installation way: Wall mounted, surface mounted.
- Flicker free driver, support triac dim and DALI dim with push dim.
- Driver replaceable for easy maintenance
- Adjustable microwave sensor available.

Application Areas

It is designed for general lighting applications in office, supermarket, shop, school, hotel, etc. It is also widely used for public areas, such as stairway, lobby, reception, corridors etc.

Daylight sensor:

Notice 1: The light threshold can be selected through the slide switch, it may cause a large deviation in different lamps.

Hold Time				
	4	5	6	
I	ON	ON	ON	5S
II	-	ON	ON	30S
III	ON	-	ON	90S
IV	-	-	ON	5min
V	ON	ON	-	20min
VI	-	-	-	30min

Hold time:

Notice 1: The hold time can be selected by the slide switch. The hold time counting should be started after the sensor is powered on and initialized.

Detection Area			
	7	8	
I	ON	ON	100%
II	-	ON	75%
III	ON	-	50%
IV	-	-	25%

Detection area:

Sensor test condition: The test is based on 3m height, the detect distance radius is based on ground, the detect distance can be adjusted through the slide switch.

Sensor test environment and reference: The detective range is measured by human body whose stature is around 1.6-1.7M with medium size and traveling speed is around 1.0-1.5M per second. If the stature, bodily form and traveling speed are changed, then the detective range will be changed accordingly.

Sensor lamp's reaction under open/narrow environment: Test result will be highly influenced by test environment, the more open environment, the closer detect distance; the narrower environment, the longer detect distance. The detector may do self-excitation in a narrow environment.

Sensor Setting based on environmental disturbance: Some environmental disturbances will cause abnormal induction, such as the lamp can not automatically turn off for a long time or the sensor function is invalid, then users can adjust sensor distance to reach the ideal effect. It is recommended to adjust the sensing distance to 50% for the environment where near the heavy equipment, metal sheets and metal pipes, concrete wall (<30cm thickness) etc. Recommend to keep 100% sensor distance in open environment. For environment where near the routers, telecommunications base stations, electrical machinery etc, it is recommended to keep the installation distance of more than 5 meters and adjust to 50% sensor distance.
